
Breakfast-debate: "Measures to fight the crisis and Win-Win recruitment plan"

The informative session celebrated at the Chamber of Commerce and sponsored by the group Easy pay, was a complete success. The event counted with Déborah Petit as speaker, who informed the audience about the extension of the different measures adopted by the Belgian government to fight the crisis.

The so called 'Win-Win' recruitment plan, from which employers and unemployed people can benefit, centered most of Petit's conference, who also gave details about the different aspects referring to the measures that have been created to alleviate the present situation. These measures can be taken either by the 'companies with difficulties' or by the rest of enterprises. Petit explained the requirements related to the production percentage and the unemployment rate that these companies must fulfill in order to ask for the different helps, as well as the institutions to which they must turn to, the information they must present, the stages to follow, or the existing deadlines.
