About “VELHAS BONITONAS” Project

“Velhas Bonitonas” project begins in 2016 with the purpose of inspiring women of all ages to age with confidence and passion, regardless their stage of life. The initiative is based on painting anonymous and imaginary women that represent real stories and people, breaking myths and prejudices associated with aging.

Maria’s innovative way of deconstructing this theme has taken her to explore different ways of expressing the message, like creating products, exhibitions, workshops, the conference Women Aging Summit, solidarity actions, empowerment sessions, personalized soul portraits, among others.

Always with an inspirational tone, Maria is creating a new meaning and perspective to the feminine aging process: more empowered, free and authentic.
