

# INTRASERVICE

*live professionals*

IFEMA is the Trade Fair Institution of Madrid. Its 30-year experience of staging trade fairs has made it the most important of its kind in Spain and one of the leaders in Europe. Its activities centre on the staging of commercial events representative of the different industries and the managing of its space and infrastructure for every type of activity: from trade fairs organised by third parties to conventions, congresses and any type of meeting or event. Its principal aims are to generate wealth and development for the Madrid Region and project the image of Madrid within and beyond our borders.

Intraservice is the agent of Feria de Madrid in the Benelux and promoting 40 International fairs in the Luxembourg, Belgium and the Netherlands. If you have interest in one of the fairs and like to receive information about one of the fairs or sectors in Spain, feel free to contact them!
